

BETZ POOLS LIMITED

Est. 1945

Own a Betz Service capacity area.

The next phase of Betz Pools is now underway.

For nearly 80 years, Betz has built its reputation on craftsmanship, service, and trust. We are now expanding that foundation into a structured platform — designed to power and dominate local pool markets.

This is not an entry into a business.

This is an opportunity to take ownership of a designated service area.

BETZ POOLS LIMITED

THE PLATFORM

A designated service area **ownership platform** — is more than a franchise.

Betz Pools is a fully integrated platform that combines retail, service, and supply into a single operating system — already built, already proven.

You are not starting from zero.

You are stepping into a system designed to scale.

Your location becomes the centre of your Designated Service Area (DSA):

- ▶ Retail drives customer acquisition.
- ▶ Service routes create recurring revenue.
- ▶ Supply chain supports both.

Over time, every pool in your designated area becomes part of your ecosystem — building density, stability, and long-term value.

STORE FORMATS

Built for Every Market. Designed to Scale.

No two markets are the same — and neither are the paths to building them.

Betz locations are structured to match the opportunity within each service zone, allowing you to grow with control and precision.

A Brand That Builds Trust — And Keeps It

Retail is not just a storefront. It is the physical expression of the Betz brand in your market.

Every location is designed to be clean, modern, and highly functional — built to convert customers and support long-term relationships.

- ▶ Merchandising is intentional.
- ▶ Layouts are optimized.
- ▶ The experience is consistent.

This is not left to chance.

The result is a brand that remains **current**, **aligned**, and **recognizable** — regardless of location.

The System Is Already Built

Most operators spend years building infrastructure.

With Betz, that work is already done.

We provide centralized systems designed to remove friction and improve performance across every market:

- › Bulk purchasing through established manufacturing relationships.
- › Centralized warehousing that reduces storage requirements.
- › A smaller operational footprint with stronger retail presentation.
- › Marketing is handled centrally — ensuring consistency and reach:
 - ▶ Campaign creation.
 - ▶ Digital advertising.

TRAINING & SERVICE EXPANSION

Build Capability. Expand Revenue.

The platform is designed to get you operational quickly — and then expand what you can offer over time.

Initial focus is simple:

- ▶ Launch weekly service routes.
- ▶ Build recurring revenue.

From there, capability expands through structured training at additional costs and fees:

- › Leak detection.
- › Pump and filter repair.
- › Diagnostics.
- › Commercial service.
- › Cover installation.
- › In-floor cleaning systems.
- › Automatic cover repair.

This is not static.

As your team develops, your revenue per customer increases — and your position in the market strengthens.

SERVICE EXPERIENCE

Service that Defines the Brand

The Betz Standard is built on responsiveness, reliability, and trust.

This is not optional — it is the foundation of the business.

Every system is designed to support that standard.

24/7 Live text access to technicians.

Ongoing customer support beyond standard hours.

Operate in real time.

EFFICIENT SYSTEMS

Operational efficiency is not an advantage — it is a requirement.

Betz provides the systems to support it.

An integrated ERP platform connects every part of the business:

- ▶ Customer communication.
- ▶ Service tracking.
- ▶ Billing and payments.

Everything runs in real time.

Flexible billing structures support both the customer and the operator:

- ▶ Immediate payment on service.
- ▶ Monthly billing programs.
- ▶ Equal monthly billing for consistent, year-round cash flow.

The result is a business that is structured, predictable, and scalable.

TERRITORY MODEL

Own the Market. Build Density Over Time.

This is where the platform becomes powerful.

Betz service zones are designed for long-term growth — not short-term activity.

Each area is structured to support a significant pool base, allowing you to build density through both retail and service.

Growth happens in layers:

- › You expand service routes.
- › Your retail location supplies those routes.
- › Additional service operators can be introduced and supported through your store.

You are not operating independently. You are building within a system designed to expand around you. This is a controlled rollout.

We are selecting a limited number of operators across Ontario.

Building Growth that Scales

- › Product launches and education sessions drive growth.
- › Shared experience improves performance across markets.
- › The system evolves as it expands.

The long-term objective is clear:

- › Reduce costs.
- › Increase efficiency.
- › Strengthen competitiveness in every market.

Serve the Entire Market — Not Just Part of It

Betz is designed to capture the full spectrum of pool ownership.

This is not a niche strategy.

Whether customers enter through service, retail, or product sales, they remain within your ecosystem — increasing lifetime value and strengthening your market position.

You control how fast you grow.

You control how deep you go.
